PROFILE

I am a member of the Millennial generation, one who believes that the internet gives us new possibilities to improve society and our relationships.

As my first big effort to take part on a big change on the world I created PianoBike, the 1º Brazilian piano on wheels, with which I have brought good music all around my country, from small cities to big capitals.

In 2020, taking on my natural aptitude to logic and mathematics I have began my journey as a DEV, because I believe it is a great tool to create a better world not just for me but also for the next generations.

EXPERIENCE

Trainee developer

2020 - current

Nata.house

Full stack developer at a software house. Working with many stacks and roles (front / back). Main contributions: Head of a big refactor on one of the projects, bringing more organization and efficiency to it. Also contributing to the overall organization of my squad and team goals.

Creator and Manager

2018 - current

PianoBike

Working as Production Director, organizing events and leading the team. Taking also, the role of commercial manager, negotiating contracts and deals.

General Manager

2016 - 2018

O Quintal Orgânico

Manager at an online supermarket.

Leading a team of 4 people and managing the full client experience cycle, including supply chain management, client satisfaction and logistics.

Main contribution: Creating efficient processes to optimize operational tasks, including automatization through excel formulas and macros.

VOLUNTEERING

Education Coordinator

2012 - 2015

CISV International

Volunteer on education program which educates children and youth around the world to build peace and understanding.

- Mediator of educational activities with children from 8 to 15 years old;
- Head of a team of 5 other volunteers to plan and organize activities and experiences for the participants.
