Spanish - Basic

Portuguese - Native

Italian - Advanced

PROFILE

I am a member of the Millennial generation, one who believes that the internet gives us new possibilities to improve society and our relationships.

As my first big effort to take part on a big change on the world I created PianoBike, the 1º Brazilian piano on wheels, with whichI have brought good music all around my country, from small cities to big capitals.

In 2018, taking on my natural aptitude to logic and mathematics I have began my journey as a DEV, because I believe it is a great tool to create a better world not just for me but also for the next generations.

EXPERIENCE

Software Engineer I   2021- current

XP inc
