PROFILE

I'm a member of the Millennial generation, one who believes that the internet gives us new possibilities to improve our society and relationships.

As my first big effort to take part on a big change on the world I created PianoBike, the 1º Brazilian piano on wheels, with which I bring good music all around my country, from small cities to big capitals.

In 2020, taking on my natural aptitude to logic and mathematics I've began my journey as a DEV, because I believe it's a great tool to create a better world not just for me but also for the next generations.

EXPERIENCE

Creator and Manager
2018 - current

PianoBike
Working as Production Director, organizing events and leading the team.
Also playing the role of commercial manager, negotiating contracts and deals.

Music Teacher
2012 - current

Particular teacher and on many schools
Applying an activy learning methodology I work as a music teacher since young age.
Encouraging my students to search for knowledge actively and teaching not just how to play an instrument but also to understand deep musical concepts and theory.

General Manager
2016 - 2018

O Quintal Orgânico
